Detailed information on Career Technical Education at San Luis Obispo High - <https://goo.gl/LkPjaa>

What to expect with CTE Instruction in the San Luis Coastal Unified Shool District:

Curriculum is driven by industry. State academic standards are integrated with current developments in the field to provide an optimal technical education. SLCUSD coordinates efforts to provide CTE Pathway teachers with professional development and industry engagement on a state and county level to give students relevant training for the region's high wage, high need and high growth jobs. Students and parents will be made aware of the steps to assure continuing CTE training for lifelong success through counseling and career exploration.

Dual Enrollment with Cuesta Community College: Some courses taught on the high school campus generate a college transcript for the student as well as credit in high school. These are designated with an asterisk* **Pathway:** 300 or more hours of CTE instruction, in a progressive sequence of courses, academic programs & learning experiences, designed to prepare individual students to work upon graduation or to progress in their education towards a technical or professional level career in a high demand occupation.

Three types of courses:

- **Introduction:** The first class in a series of courses; the foundation for a pathway.
- **Concentration:** The intermediate level of classes focusing on a specific pathway.
- **Capstone:** The advanced level of classes in a series of coursework specific to a pathway. Advanced students may be placed in internships in the community. You're a CTE completer when you have completed 300 hours of instruction in a sequence. An example is completing two 180 hour classes.

Courses in **RED** meet UC/CSU College entrance requirements
