

## Physician Mentoring Program for Students 17 yrs. or older

- ◆ 6-8 weeks between June and August
- ◆ 3-5 day per week commitment
- ◆ Arroyo Grande Community Hospital
- ◆ French Hospital Medical Center
- ◆ Marian Regional Medical Center

The Dignity Health Physician Mentoring Program provides local high school students the opportunity to witness & understand the importance of professions in the medical field, from evaluation and treatment for follow-up care.

Doctors from a variety of specialties volunteer their time, leading students in the office setting, on their hospital rounds, in the emergency department, and even in the operating room. Each week, participating students work with a different medical professional in a different specialty. This rotation introduces the participating students to the many multidisciplinary facets of medicine. By exposing the students to many specialties, participants have a more complete understanding of the diversity of medical career opportunities.
