8 x 10

5 x 7

4 x 6

An aspect ratio of a 5x7 would be ideal for senior portraits, so we don't have to crop off too much of the image, especially if the senior selects an image that is already close-up.

If we change the yearbook image size to 1.9 inches x 2.66 inches, this would be the same aspect ratio as 5x7.

To calculate the same aspect ratio of 5x7: simply divide 5 by the width you want the image to be. Then divide 7 by the quotient.

$$5 \div 1.9 = 2.63157895 \quad 7 \div 2.63157895 = 2.66000005$$

image size 1.9 x 2.66 is the same aspect ratio as 5x7
